RESPIRATORY AND CIRCULATORY QUIZ STUDY GUIDE

- Respiratory System
 - What is its purpose? to supply oxygen to the cells
 - Supplies oxygen and removes/releases carbon dioxide
 - Controls breathing and gas exchange
 - Major Organs: nose, trachea, lungs, diaphragm

- Circulatory System
 - What is its purpose? to deliver blood to the body's tissues
 - Major Organs: heart, blood vessels (veins, arteries).

- Organ System Relationships
 - Muscular and Circulatory: combined efforts allow for the pumping of blood throughout the body
 - Respiratory and Circulatory: respiratory system-PROVIDES/SUPPLIES oxygen for cells circulatory system: TRANSPORTS oxygen to cells
